I have this issue of clock setting which sets as +5 1/2 hrs after every logoff The time update does not happen automatically though i have tried several others in the drop down list other than time.. Download Clock Bar, and run it It adds an icon to the Menu bar that's basically just a clock icon that won't show you the current time, not that you need it.

Is this a known bug? Has anyone noticed this or is this happening to you? How old is your Mac? Don't know with the latest generations of hardware, but earlier Macs had a separate and non-rechargeable battery meant to preserve the PRAM contents when powered off.. I've noticed that the clock on my Macbook pro disappears after 23:59 hours (currently running OSX mavericks latest update) - This happens repeatedly.. When the battery finally gave up the ghost, loss of the time/date settings was the first manifestation.. As i logoff and logon the time though selected Indian Time is showing as +5 1/2 hours.
