Here we talk about how you can distribute your finished game With the information in the preceding sections of this manual you can begin to create your games, but when your game is finished you obviously want other people to play it.. Each of the individual targets has their own settings and you must ensure that they are correctly configured in the Global Game Settings and Preferences before you continue.. These last three, will be only available for the paid version of the application.. html can also be customised to show your game with a different background colour, or at a different position etc.. exe for Windows, generate JavaScript and HTML for use in a browser, or create a package for one of the other target modules.. Once you have done this, the necessary files will be generated so that you can distribute it as you wish. b0d43de27c [Winrar Serial Key 2018 5.60](#)
